

BrightBeam

Forensic Laser Systems

BrightBeam Accessories Kits

The BrightBeam is the most advanced laser illumination equipment on the market. BrightBeam delivers the highest power blue and green laser power and superior beam quality for latent finger print and evidence detection. A complimentary set of accessories is offered so that users can quickly scan with blue or green for the broadest selection of evidence detection and latent finger print fluorescence viewing and capture on the market.

The accessories are selected for ease of use, portability and high reliability for the most demanding forensics laboratories in the world. Equipped with the most advanced laser illumination system your team can quickly process latent finger prints and biological evidence from the most demanding of crime scenes efficiently and thoroughly.
